Master Password for Areca ARC-1210 Controller

 In case you forget the password for an Areca ARC-1210 controller, the master password might be your friend ;-)
I'm not sure if I'm actually allowed to publish this here. However, I did never sign a NDA to get it, so I think it's ok ;-)

Here it is (numbers are underlined for better readability):

MNO974315743924

According to one commentor, it might be needed to lower-case the letters:

mno974315743924

Also, it might be necessary to _not_ type the numbers on the numeric keyboard but on the regurlar number keys.
